INTEGRATE SELENIUM - MAVEN-JENKINS

Download Maven Apache.

Download the latest version

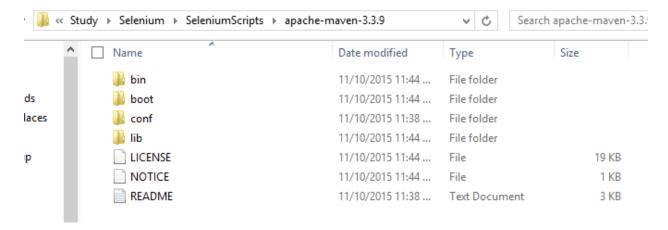

Files

Maven is distributed in several formats for your convenience. Simply pick a ready-made binary distribution archive and follow the installation instructions. Use a source archive if you intend to build Maven yourself.

In order to guard against corrupted downloads/installations, it is highly recommended to verify the signature of the release bundles against the public KEYS used by the Apache Maven developers.

	Link	Checksum	Signature
Binary tar.gz archive	apache-maven-3.3.9-bin.tar.gz	apache-maven-3.3.9-bin.tar.gz.md5	apache-maven-3.3.9-bin.tar.gz.asc
Binary zip archive	apache-maven-3.3.9-bin.zip	apache-maven-3.3.9-bin.zip.md5	apache-maven-3.3.9-bin.zip.asc
Source tar.gz archive	apache-maven-3.3.9-src.tar.gz	apache-maven-3.3.9-src.tar.gz.md5	apache-maven-3.3.9-src.tar.gz.asc
Source zip archive	apache-maven-3.3.9-src.zip	apache-maven-3.3.9-src.zip.md5	apache-maven-3.3.9-src.zip.asc

Extract the file

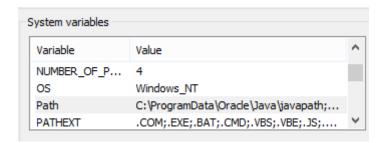

Now Declare Maven in Environment Variable.

Variable Name: MAVEN_HOME

Variable Value: M:\Study\Selenium\SeleniumScripts\apache-maven-3.3.9

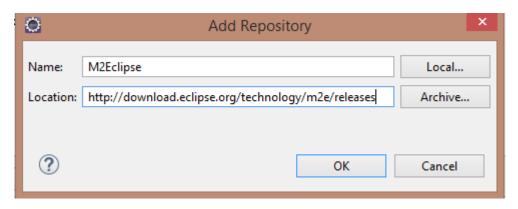

path Name: Path

Path value: M:\Study\Selenium\SeleniumScripts\apache-maven-3.3.9\bin;

Now Add the Maven Plugin in Eclipse . If you have Eclipse luna /higher version, No need to add plugin. Because Maven is inbuilt after Kepler.

*open Eclipse Kepler->help->Install new software->Add

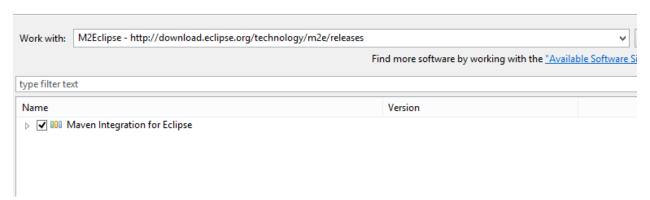

Press ok.

Check the maven integration for eclipse and proceed the installation.

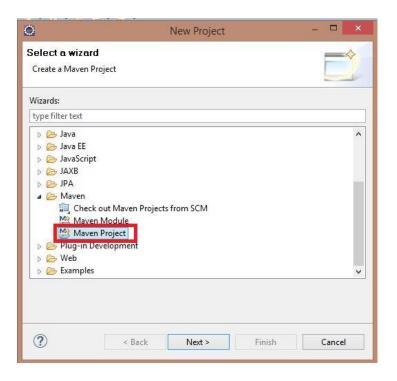

Available Software

Check the items that you wish to install.

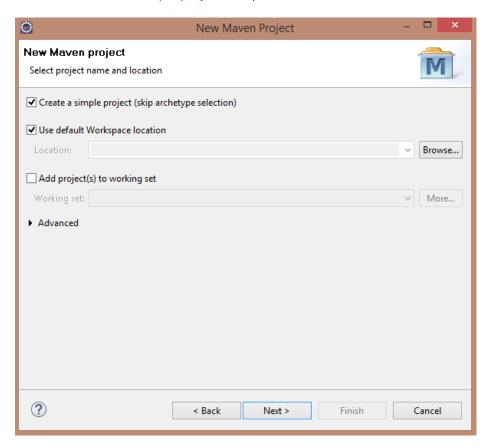

*Create New Maven Project.

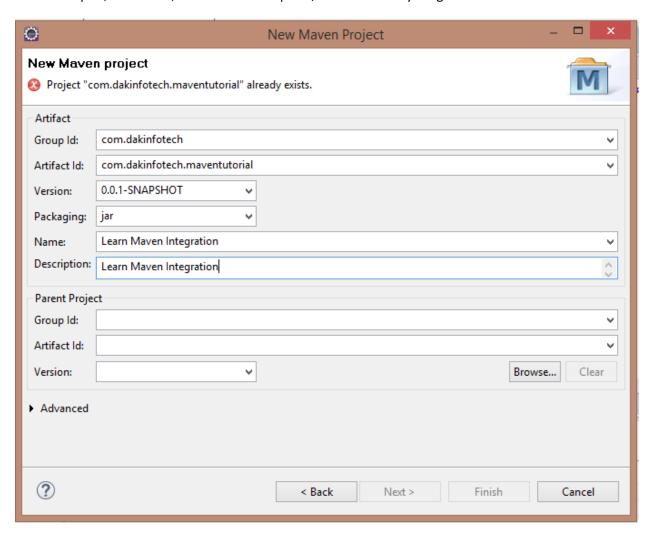

File->Project->Maven project

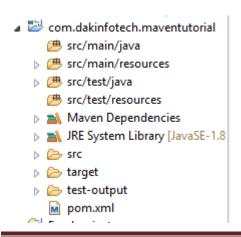

*Check the Create a simple project and press next.

Enter Group ID, Artifact ID, Name and Description, it should be anything.->Finish.

Will take some time for Project Creation. Check the progress bar right hand side bottom corner.

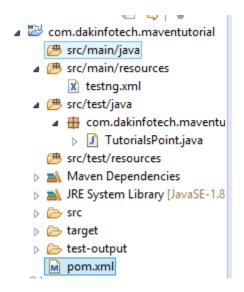

Edit the pom.xml file(Note: for maven, testing and selenium assign the latest version).

```
project xmlns="http://maven.apache.org/POM/4.0.0"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xsi:schemaLocation="http://maven.apache.org/POM/4.0.0
http://maven.apache.org/xsd/maven-4.0.0.xsd">
 <modelVersion>4.0.0</modelVersion>
 <groupId>com.dakinfotech
 <artifactId>com.dakinfotech.maventutorial</artifactId>
 <version>0.0.1-SNAPSHOT
 <name>Learn Maven Integration
 <description>Learn Maven Integration</description>
 <packaging>jar</packaging>
 properties>
<suiteXmlFile>src/main/resources/testng.xml</suiteXmlFile>
</properties>
<dependencies>
 <dependency>
     <groupId>org.testng</groupId>
     <artifactId>testng</artifactId>
     <version>6.8</version>
     <scope>test</scope>
 </dependency>
 <dependency>
     <groupId>org.seleniumhq.selenium
     <artifactId>selenium-java</artifactId>
     <version>2.53.0
 </dependency>
</dependencies>
<build>
<plugins>
<plugin>
<groupId>org.apache.maven.plugins
<artifactId>maven-compiler-plugin</artifactId>
<version>3.3
<configuration>
<compilerVersion>1.8</compilerVersion>
<source>1.8</source>
<target>1.8</target>
</configuration>
</plugin>
<plugin>
<groupId>org.apache.maven.plugins
<artifactId>maven-surefire-plugin</artifactId>
<version>2.18.1
<configuration>
<suiteXmlFiles>
<suiteXmlFile>${suiteXmlFile}</suiteXmlFile>
```

```
</suiteXmlFiles>
</configuration>
</plugin>
</plugins>
</build>
</project>
*Create a simple program in src/test/java
package com.dakinfotech.maventutorialtutor;
import java.util.concurrent.TimeUnit;
import org.openga.selenium.By;
import org.openga.selenium.WebDriver;
import org.openga.selenium.firefox.FirefoxDriver;
import org.testng.annotations.Test;
public class TutorialsPoint {
      @Test
      public void test1(){
            WebDriver driver=new FirefoxDriver();
            driver.get("http://newtours.demoaut.com/");
            driver.manage().window().maximize();
            driver.manage().timeouts().implicitlyWait(3, TimeUnit.SECONDS);
      driver.findElement(By.name("userName")).sendKeys("arund87@gmail.com");
            driver.findElement(By.name("password")).sendKeys("pass123");
            driver.findElement(By.name("login")).click();
            driver.manage().timeouts().implicitlyWait(3, TimeUnit.SECONDS);
            driver.quit();
      }
}
* Right click the class file and Convert to testng.xml.
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE suite SYSTEM "http://testng.org/testng-1.0.dtd">
<suite name="Suite" parallel="none">
  <test name="Test">
    <classes>
      <class name="com.dakinfotech.maventutorialtutor.TutorialsPoint"/>
    </classes>
  </test> <!-- Test -->
</suite> <!-- Suite -->
```

*Move the testng.xml file to src/main/resource because in pom.xml we declared this path.

Now your maven setup is ready for execution.

*open the command prompt(cmd).

>Go to the path of the workspace.

>mvn clean =>This will clean the build.

>mvn install =>it will build the package and run the test.

```
TESTS

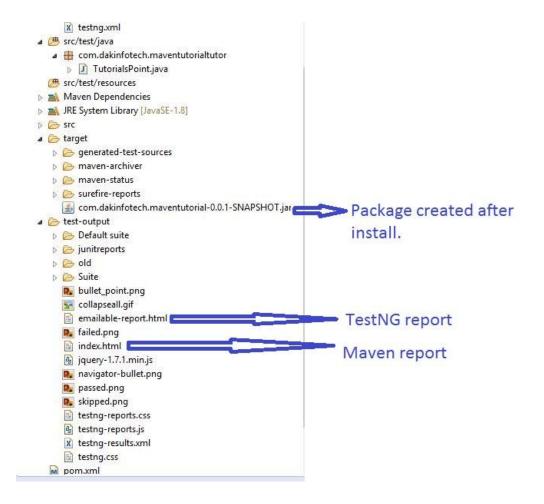

Running TestSuite
Tests run: 1, Failures: 0, Errors: 0, Skipped: 0, Time elapsed: 19.758 sec - in TestSuite

```

*Now open the jenkins URL in browser. http://localhost:8080/

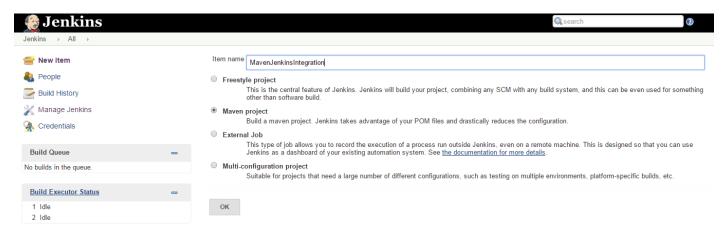

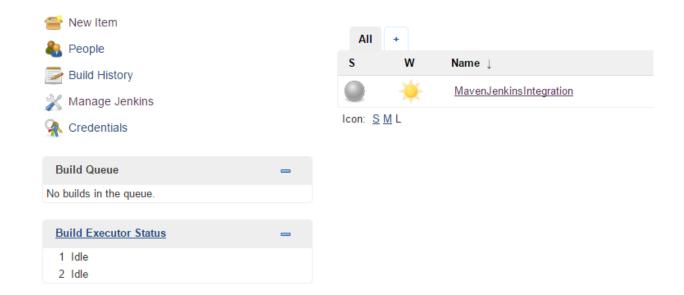

Go to Manage Jenkins->Configure System. Add the JDK Installation and Maven Installation then save it.

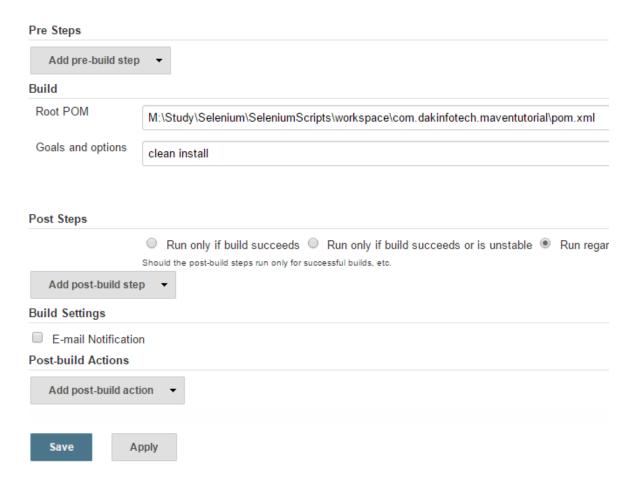

Refer Environment variable.

*New Item->Maven Project->Enter your project name and press OK.

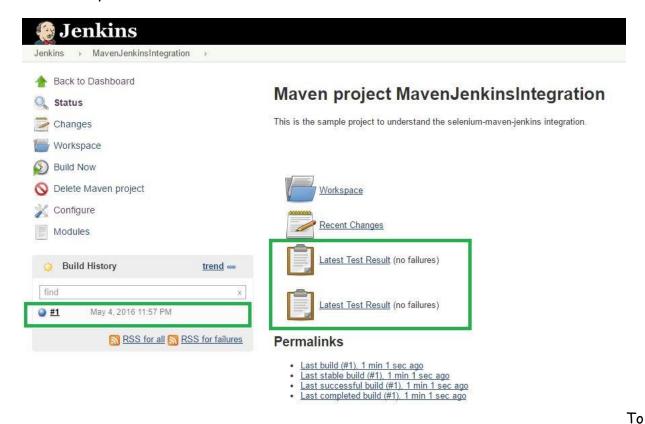

Project is created.->open the project->configure the root pom and save it.

Now execute the program by Build Now. *Congrats your first integration test is successfully ran.

view console output. >Press #1 and select console output.
